ALSPITAL

WHO WE ARE ???

Team Auspitality brings over 25 years of niche industry experience, delivering intelligent automation solutions designed specifically for the hospitality sector.

Auspitality is a leading provider of smart automation technologies, dedicated to transforming the hospitality experience through innovation and precision. We offer comprehensive hotel automation systems that provide centralized control over critical hotel operations—from lighting and climate control to safety and energy management.

With a strong focus on guest comfort, operational efficiency, and energy optimization, our solutions are engineered to enhance service standards while supporting the sustainability goals of modern hotels.

From refined in-room automation to complete control of banquet halls, meeting rooms, and back-end operations, Auspitality empowers hotels to operate smarter, smoother, and more sustainably—delivering maximum impact with minimal civil intervention.
